Digital Scholarship Program
Digital scholarship is the use of digital tools and resources to achieve scholarly and research goals.
Digital Scholarship?

Digital Humanities?
“...digital scholarship marks a move away from the passive, one-way form of communication... It is a new form of inquiry and practice that generates **new questions, new evidence, new conclusions**, and **new audiences** as it is used.”

“to *democratize* knowledge to reach out to ‘publics,’ share academic discoveries, and invite an array of audiences to participate in knowledge production”

Bridget Draxler, et al.

“In an age of visualization, analytics, big data, and new forms of online publishing, these central spaces [university libraries] can facilitate knowledge creation and transfer by connecting people, data, and technology in a shared collaborative space.”
