Department of History

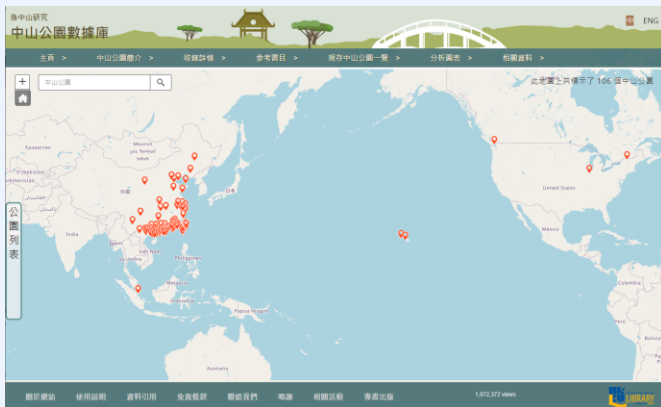

# Sun Yat-sen Research Project

- ❖ Since 2004, the esteemed entrepreneur and philanthropist, Dr. Tan Siu-lin, has generously made multiple donations to support the History Department in conducting research related to Dr. Sun Yat-sen.
- ❖ In 2009, the Sun Yat-sen Research Fund was officially established within the History Department. Initially, its focus was primarily on organizing seminars and conferences. Starting from 2015, the research team initiated various research projects and subsequently released a series of outcomes. These achievements encompass academic conferences, publications, exhibitions, and online databases.

# History x Library

- ❖ In our efforts to advance Sun Yat-sen studies, we have forged a partnership with the Digital and Multimedia Services Section of the library to successfully convert our research findings into online databases
- ❖ Our primary focus revolves around exploring the diverse forms of commemoration associated with Sun Yat-sen, as well as delving into the multifaceted aspects of his image and enduring memory.
- ❖ To date, we have unveiled four databases.

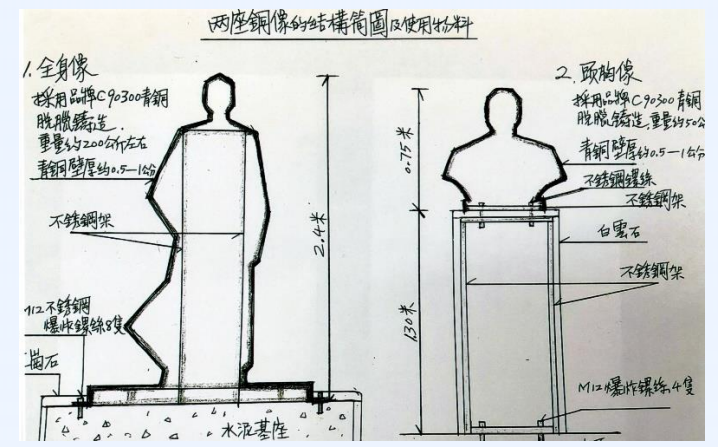

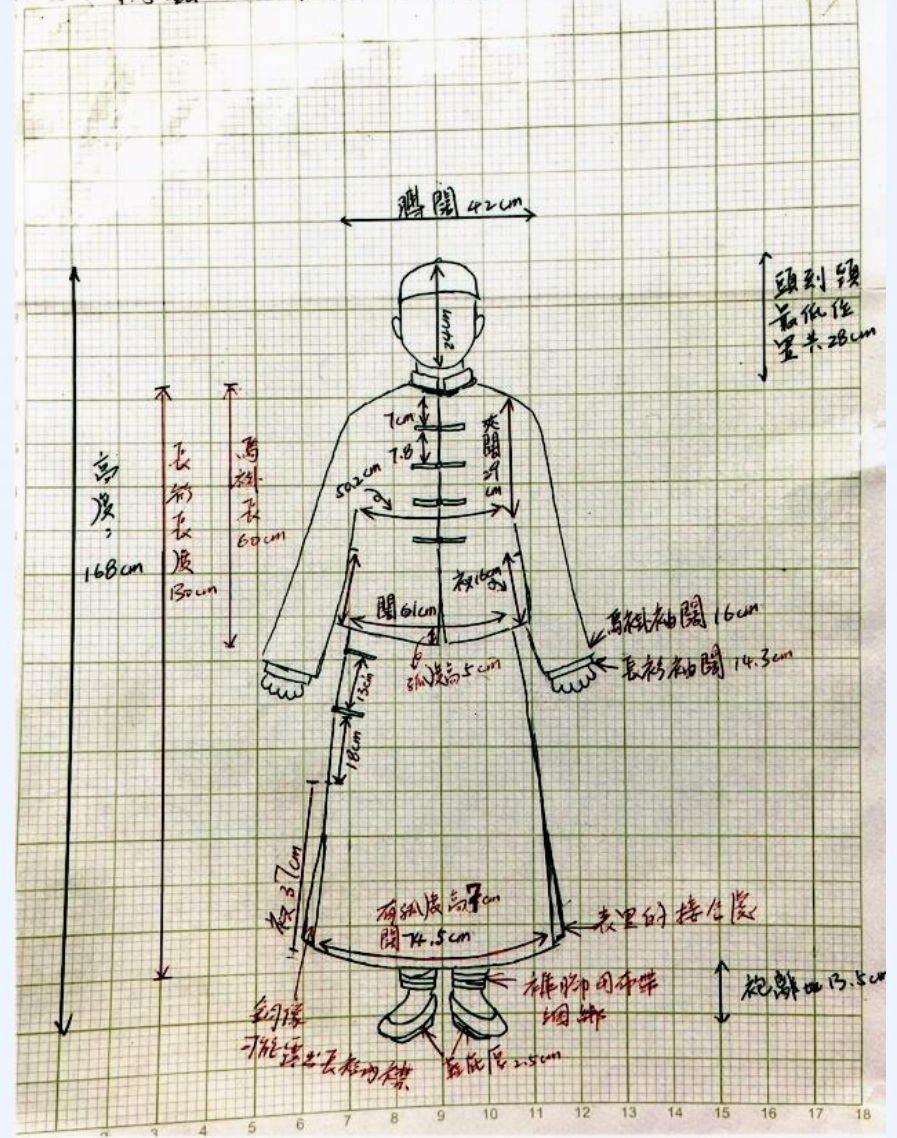

# Sun Yat-sen Statues in Hong Kong

- ❖ The well-known local sculptor, Chu Tat-Shing (朱達誠), has designed two bronze statues of Sun Yat-sen that showcase local characteristics in Hong Kong.
- ❖ Over the past two years, we have had multiple interactions with him, including interviews and invitations to give lectures. He has also shared his design sketches during the creative process.
- ❖ Furthermore, our team has collected miniature versions of these two bronze statues.
- ❖ As a result, we have decided to highlight the fusion of history and art as the main theme. The exhibition and database will be launched in November.
